

# IMAGINE.

If you could make *three* improvements to your children's curriculum, which would you choose?

- One-year cycle** ...my teachers can become better teaching the same Bible stories every year.
- Cool kids' website** ...parents and children can continue learning all week long.
- Non-dated and Non-graded flexibility** ...I can use it when and how I want.
- Always fresh** ...kids experience a different Bible lesson every week for six years—no repeats!
- Integrate missions** ...my kids will develop a global world-view.
- Clear Gospel presentation** ...teachers don't have to make it "fit" into the curriculum.
- Motivate parents** ...they'll have effective, easy-to-use tools to reinforce the lessons.
- Cost much less** ...I'll be able to stretch my curriculum budget into other areas.

What if you could have them all?

**DiscipleLand™**
